ABOUT THIS PACK

This teaching resource pack has been handpicked by the Teach Starter team to include a range of resources that can be completed at home by children with the assistance of their parents or guardians.

The pack includes resources covering the key learning areas of English, Maths and Science, along with some additional craft and mindfulness activities - all for free!

In the rare event of a school closure or if a student needs to work remotely, this pack can be sent home with students or passed on directly to parents and guardians digitally to allow for students to complete the work with minimal preparation and supervision.

The pack is designed to allow for non-teachers to understand and implement the activities in a home environment without requiring additional resources found in a classroom. The pack can be completed digitally on a tablet/iPad or with pen and paper when printed.

For Teachers

Can I share this pack with parents, students and other teachers?

Of course! This pack has been created specifically for this purpose. Please feel free to share this pack digitally with your students, their parents or guardians, or other teachers.

You can share by copying the URL in the address bar of your browser, or simply clicking on the envelope icon above to send to an email address. You can also download the pack, and email the PDF document itself.

Please feel free to bundle this pack with your own home learning activities to extend or reinforce particular concepts for your students. You may also like to add specific activities such as reading, outdoor play, fine motor skills etc.

For Parents

How can I teach my child if their school closes?

By downloading this free resource pack, you will be equipped with a wide range of activities to share with your child while their school is closed.

We have ensured that this pack can be delivered by non-teachers by providing a helpful table of contents and activity overviews. All activities are age-appropriate and most will relate to work that your child has experienced in the classroom.

The activities can be completed in any order and have been selected to allow parents and guardians to easily implement them.

Kindergarten

CONTENTS

English

Handwriting Preparation

Tracing Lines - Fine Motor Skills

A set of 4 animal-themed line tracing worksheets. Use these animal-themed tracing worksheets to develop directional pushes and pulls of a pencil. This will help your students when they begin to form letters during writing.

Initial Sound Recognition

Initial Sound Recognition Worksheets (Complete Set A-Z)

A set of colouring activities to develop letter recognition and phonemic awareness. Select only a few of the letters or have students work their way through all the letters of the alphabet.

Reading

My Book Report Template

Students can pick a recent text they have read and then complete this Book Report template. Two different versions have been provided. Students can verbally answer the questions and have their answers scribed for them.

I Know That Word! Match-Up Activity

Students use the sight words as labels, placing them on the posters beside the identified objects.

Story Map

After reading a story book together, work with students to fill in the provided Story Map. This could be completed using several different books. Students can also use this template to plan and write a narrative text of their own.

Maths

All About Rectangles Mini Booklet

A mini booklet to assist younger students in recognising and drawing rectangles. The worksheet easily folds to create a mini booklet about rectangles.

Find the Pattern Worksheet

A worksheet to assist early learners in recognising patterns. This worksheet includes AB, ABB, ABC, AABB, ABCC and AAB patterns.

I Can Count - Worksheet

A worksheet for students to practise counting up to 10 objects.

Little Number Books (1-20)

A set of little books to assist younger students with number recognition and understanding numbers 1-20. This resource includes a little book for each of the numbers from 1-20. Complete a little number book each day. This could be used as a maths warm-up activity each morning.

Patterns Maths Investigation - Bands of Friendship

A mathematics investigation involving patterns, embedded in a real-world context. This open-ended mathematics investigation has been designed to deepen students' understanding of patterns.

Shopping Trolley Match-Up Activity

A fun activity to be used to reinforce a variety of mathematical concepts. The shopping trolley has a grid marked on it with various 'teen' numbers and 2D shapes placed in the grid.

When Does It Happen? Worksheet

A cut and paste activity where students order familiar daily events.

Positioning Worksheets

Three worksheets using positioning vocabulary. Students are required to fill in the worksheets using the positioning language provided.

Other

Zany Hairstyle Template

A fun art activity where a drawing needs to be completed. Provide your students with this incomplete drawing of a person's head. Students add a hairstyle to the head. The hair might be added by drawing or by using mixed media such as ribbons, pipe cleaners, wool, pom poms etc.

All About My Family Mini Booklet

A template for students to complete all about their family. The pages can be stapled together to make a booklet.

Panda Colouring in Sheet

Students use this sheet when they require a brain break or at the end of the day.

Sorting Objects by Property Template

A template to use when sorting objects using the sense of touch and sight. Assemble a collection of objects from around the house and students are required to select them and sort them according to given descriptions.

What If? Materials Template

A set of 6 templates to use when investigating the properties of materials. This is a fun activity that allows students to think about every day objects and the materials that they are made out of.

The Scenario

Very soon, your class will be celebrating the International Day of Friendship. To help mark the occasion, your teacher is asking everyone in the class to design and make a friendship band for a special friend. You will need to use coloured, circular beads in a repeating pattern. You must use at least three colours in each design.

Your teacher would like you to create three different friendship band designs before deciding which one you like the best. You will also need to describe the pattern you have used in each design.

The Task

To create three friendship band designs using a repeating colour pattern.

The Materials

- Coloured pencils or markers
- String
- Coloured Beads

The Procedure

1. Colour three different friendship band designs on the template provided.
2. Describe the colour pattern that you have used for each design.
3. Choose which friendship band design you like the best.
4. If the materials are available, make your design using string and coloured beads.

Reflection

Shade the face to describe how you feel about how you worked during the investigation.

I listened to my teacher's instructions.			
I listened to the ideas of my classmates.			
I shared my ideas with my classmates.			
I tried to complete my work neatly.			
I tried to complete my work on time.			
I asked for my teacher's help when I needed it.			
I concentrated on the task I was doing.			
I did my best work on this task.			

SHOPPING TROLLEY MATCH-UP

A Barrier Game

Barrier games require players to either give or receive instructions. They are an excellent listening and speaking activity. Two players are separated by a barrier, such as a large book (one that will stand up by itself) or an easel. The barrier is there to block each player from seeing the other's work. One player is the speaker and the other is the listener, who follows directions.

In this activity, the goal is for the listener to place their food cards on the identical grid squares as the speaker.

How to Play

1. Set up barriers between the players.
2. Each person will need a copy of the shopping trolley grid and a set of food cards.
3. Allow time for the speakers to place their food cards onto their shopping trolley grid. Ensure the speaker's grid cannot be seen by their listening partner.
4. Speakers proceed to give instructions to their partner on which food to place in the trolley and where to place it. They might say, "Put the card with 3 bananas on the purple square" or "Put the box of raisins on top of the number sixteen", etc. The speaker continues to give instructions until they have explained the placement of all of the food cards in their trolley.
5. On completion, the barrier is removed, and the results are compared.
6. Swap roles and follow the same procedure.
